About me

I am a creative and curious individual with a strong interest in technology, people, and leadership. Throughout my years in the IT industry, I have had the privilege of working with outstanding teams and gained valuable experiences in both technology and human aspects.

My expertise lies primarily in web application development, effective teamwork, leadership, and project management. With my skills in Front-end development, Docker, and digital strategy, I have been able to work as a freelance developer, taking on responsibilities as a project manager and roles involving product development and product ownership. My leadership abilities and problem-solving skills have contributed to the success of projects, resulting in improved profitability and high customer satisfaction.

I reside outside Stockholm with my wife, Camilla and our son, Dante. During my free time, I enjoy activities such as training, reading and listening to books, and, whenever possible, cooking large meals for friends and family.

Selected work history ¹

Lachmann Software Development (October 2018 - Present)

- Founder, Freelance Developer, and Project Manager.
- Specializing in modern web development, effective leadership, and project management.
- Close collaboration with clients to deliver high-quality solutions.
- Project management with a focus on successful deliveries and high customer satisfaction.

Asurgent AB (June 2022 - March 2023)

- Cloud Consultant (Sub-consultant)
- In the role of Cloud Consultant, I made a transition from a front-end development-focused role to DevOps, with focus on the Microsoft Azure ecosystem.
- Developed and managed Azure services and created/updated build and deployment systems using tools such as Azure DevOps and GitHub.
- Led projects where we built, learned, and trained teams and groups in new technologies and best practices.

Royal Design Group Holding AB (August 2020 - August 2022)

- Lead Application Developer
- I was hired as a senior front-end developer and was after about 6 months later offered the role of Lead Application Developer for the e-commerce websites Rum21 and Royal Design.
- In this role, I led projects and oversaw the development aspects of all domains (at the time 12 domains for Royal Design and 4 for Rum21).
- I implemented new solutions, built integrations and had ownership of the e-commerce codebase.

¹ *This is a selection of my experiences, complete work history is available on my [Linkedin](#)

- I led projects to improve website performance, implemented a new interface design for Rum21, implemented 3D solutions for product viewing and optimized resource utilization in the cloud environment (MS Azure), resulting in increased profitability, scalability, customer satisfaction and annual savings of approximately 250,000 SEK in cloud expenses.

Svenskt Näringsliv (August 2019 - August 2020)

- Front-end Lead/System Architect (Consulting Assignment)
- I designed and developed two new web applications, [Svenskt Näringsliv](#) and arbetsmarknadsnytt (currently [grona.org](#)), and built infrastructure in Azure.
- I led the transformation process, conducted user studies, and collaborated with designers and other domain experts.
- I successfully migrated services and infrastructure to Microsoft Azure.
- I built CI/CD workflows and deployment pipelines using Azure DevOps, among other tasks.

Mevisio (March 2019 - August 2019)

- Front-end Developer/DevOps Engineer (Consulting Assignment)
- Contributed to the development of microservices and applications using Docker.
- Played a crucial role in project planning and container implementation.
- Ensured high security standards and seamless operation without internet connectivity.

House of Education (October 2018 - March 2019)

- Javascript Engineer (Consulting Assignment)
- Improved an existing product by developing a new Minimum Viable Product (MVP).
- Created a user-friendly platform for students worldwide to discover educational institutions.

- Achieved significant performance improvements and conversions compared to the previous platform.

One Agency Sweden AB (June 2017 - November 2018)

- IT Consultant/System Developer
- Worked as an IT consultant and system developer.
- Offering expertise in various areas, including software development, web development and container solutions.
- During my time at one agency, i worked with Telenor, LeoVegas and a short assignment at Fyndiq

LeoVegas Group (March 2018 - October 2018)

- Javascript Engineer (Consultant)
- Contributed to the Responsible Gaming team by developing and implementing features for responsible gambling, which you can read [more about here](#).
- Promoted responsible gambling standards and provided support to users at risk of developing problematic gambling patterns.
- Also joined the Expansion team, which focused on platform development and customization to meet the requirements of new markets and expansions into new countries.
