ABOUT ME

I am a creative and curious person with a keen interest in technology, people, and leadership.

Over the years, I have been fortunate to work with many amazing teams and gained valuable experience working with both technology and people.

I live outside Stockholm with my wife Camilla and our son Dante.

In my free time, I enjoy taking walks in nature, reading and listening to books, cooking, and spending time with friends and family.

WORK HISTORY [1]

Cloud Consultant - Asurgent AB

After working as a front-end developer for several years, I decided to transition into a more DevOps and cloud-focused role. Given my experience with Microsoft Azure, becoming a DevOps engineer with a focus on the Azure ecosystem felt like a natural choice. As a Cloud consultant and DevOps engineer, I am responsible for maintaining Azure services and creating and updating build and deployment pipelines in Azure DevOps. What i enjoy the most about this position is the possibility to work with other people and teams to help them implement solutions and learn

---

[1] This is my recent work-history, for a complete overview please see my Linkedin page

Lead Application Developer - Royal Design Group Holding AB

As Lead Application Developer for Royal Design & Rum21, I oversaw web development for the company's e-commerce side. During my tenure, I implemented numerous improvements, including enhancing user experience and interfaces, streamlining the release flow for greater scalability, and optimizing continuous delivery for greater cost efficiency.

Upon joining the team, I recognised that the codebase was somewhat disorganised, and there was a lack of oversight on the IT-related aspects of the business. To address this, I led several projects, such as establishing complete and highly available documentation of the entire codebase, services, and workflows, as well as increasing code readability.

One of my accomplishments was reducing the total weight of the RoyalDesign & Rum21 domains from an average of 11.1 MB in the browser with a load-time of 6.6 seconds to a total weight of 2.1 MB and a load-time of 2.4 seconds.

My team and I achieved this without removing any major functionality and continuously improving the existing code and adding new features.

These efforts resulted in increased user satisfaction, sales, and website traffic.

Founder - Lachmann Software development

As a freelance web developer and IT consultant, I specialized in building modern web applications, systems design, and UX solutions. I have had the privilege of working with numerous clients and have assisted them with a wide range of issues.

For example, I helped House of Education develop a minimum viable product (MVP) from scratch and successfully implemented the idea as a new solution that became their primary product and largest revenue stream. Additionally, I assisted Mevisio, a startup, in containerizing their applications with Docker and creating a secure "closed-box" solution that met high-security standards for their customers.

IT-Consultant/Systems Developer/Scrum master - One Agency

At One Agency in Stockholm, I worked as an IT consultant on a variety of assignments, primarily focused on front-end/full-stack development. I also served as a scrum master for clients such as Telenor, Fyndiq, and Leo Vegas. In addition, I developed an in-house back-office system for the internal financial department.

Lead Front-end Developer - Pepins

After consulting for Pepins for six months, I was offered a position as their lead front-end developer. In this role, I was responsible for working with the programming stack, which included PHP, JavaScript, jQuery, HTML, CSS, as well as tools such as Brackets, Sublime, Photoshop, Google Analytics, Hubspot, and Wordpress.
In addition to my development responsibilities, I also handled in-house IT support and managed purchases related to IT. I performed a lot of administrative work as well, including issue and project tracking for the company using scrum and Atlassian software.

LEADERSHIP SKILLS

I have a proven track record of spearheading successful projects while maintaining clear and well-documented roadmaps. I prioritize keeping a well-trimmed backlog and setting clear goals, both short-term and long-term, to ensure clarity throughout the company.

I strongly emphasise communication, team health, and productivity, and have a keen ability to keep projects on track while maintaining a positive and collaborative work environment

EDUCATION

Nackademin
Web- and informationsdesign
Graduated 2015

Södertörns högskola
Bachelor of Arts Journalism
Graduated 2013

Kungliga Tekniska högskolan
Mathematics, Physics, chemistry
